

```
#!/usr/bin/env python3
import os
from PIL import Image
old_path = os.path.expanduser('~') + '/images/'
new_path = '/opt/icons/'
for image in os.listdir(old_path):
    if '.' not in image[0]:
        img = Image.open(old_path + image)
        img.rotate(-90).resize((128, 128)).convert("RGB").save(new_path + image.split('.')[0], 'jpeg')
        img.close()
```
